FALCON

INSTALLATIONS LTD

Local Family Run Business - EST 1990

Falcon Installations has been helping people improve their homes with quality uPVC products, since 1990, and we can help transform your home too.

We're a family run company offering a range of uPVC windows, doors, conservatories, porches and roofline products, to homeowners in South Wales and further afield.

When you buy from Falcon, not only do you benefit from fantastic products, you'll get a friendly and professional service too. Our installers work exclusively for us and each have 10+ years of installation experience.

If you want to take a look at the quality of our products first-hand we have a showroom on Bridgend Industrial Estate, Bridgend. Pop in today where a member of our team will be happy to help.

Why choose Falcon Installations?

- FENSA registered company – Reg No. 18159
- Government endorsed – members of the TrustMark scheme
- Comprehensive 10 year Insurance Backed Guarantee
- Family owned and operated business since our inception in 1990
- Top quality products and craftsmanship
- Salaried representatives that do not earn commission
- Excellent customer service for the lifetime of your products

Upgrading your old windows means you can enjoy a quieter, more comfortable environment. Problems such as draughts and condensation can be reduced, and you'll be able to relax in a warmer home, as well as save on your energy bills.

There are lots of styles in our range for you to choose from, including: our popular casement designs, sliding sash, flush sash windows, tilt 'n' turn and french windows. We have a type of window to suit almost every property.

These can then be coloured using a range of foils or woodgrain effect finishes, giving a timber appearance. And for the finishing touches, we offer a range of hardware in a selection of finishes to complement your new windows.

Features and benefits:

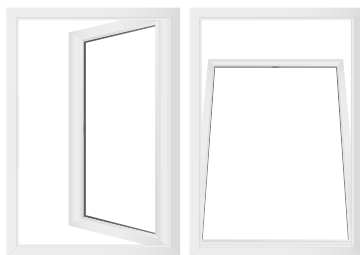

- Choice of frames to give a contemporary, angled look or a softer, curvier style
- Multi-chambered frame improves thermal insulation
- High security locking systems gives you complete peace of mind
- Wide colour choice to pick from and guaranteed colour match on all uPVC products
- Decoration such as: Georgian bars, lead designs, bevels and stained glass are also available
- View our range of decorative/patterned glass on page 9

uPVC Vertical Sliders

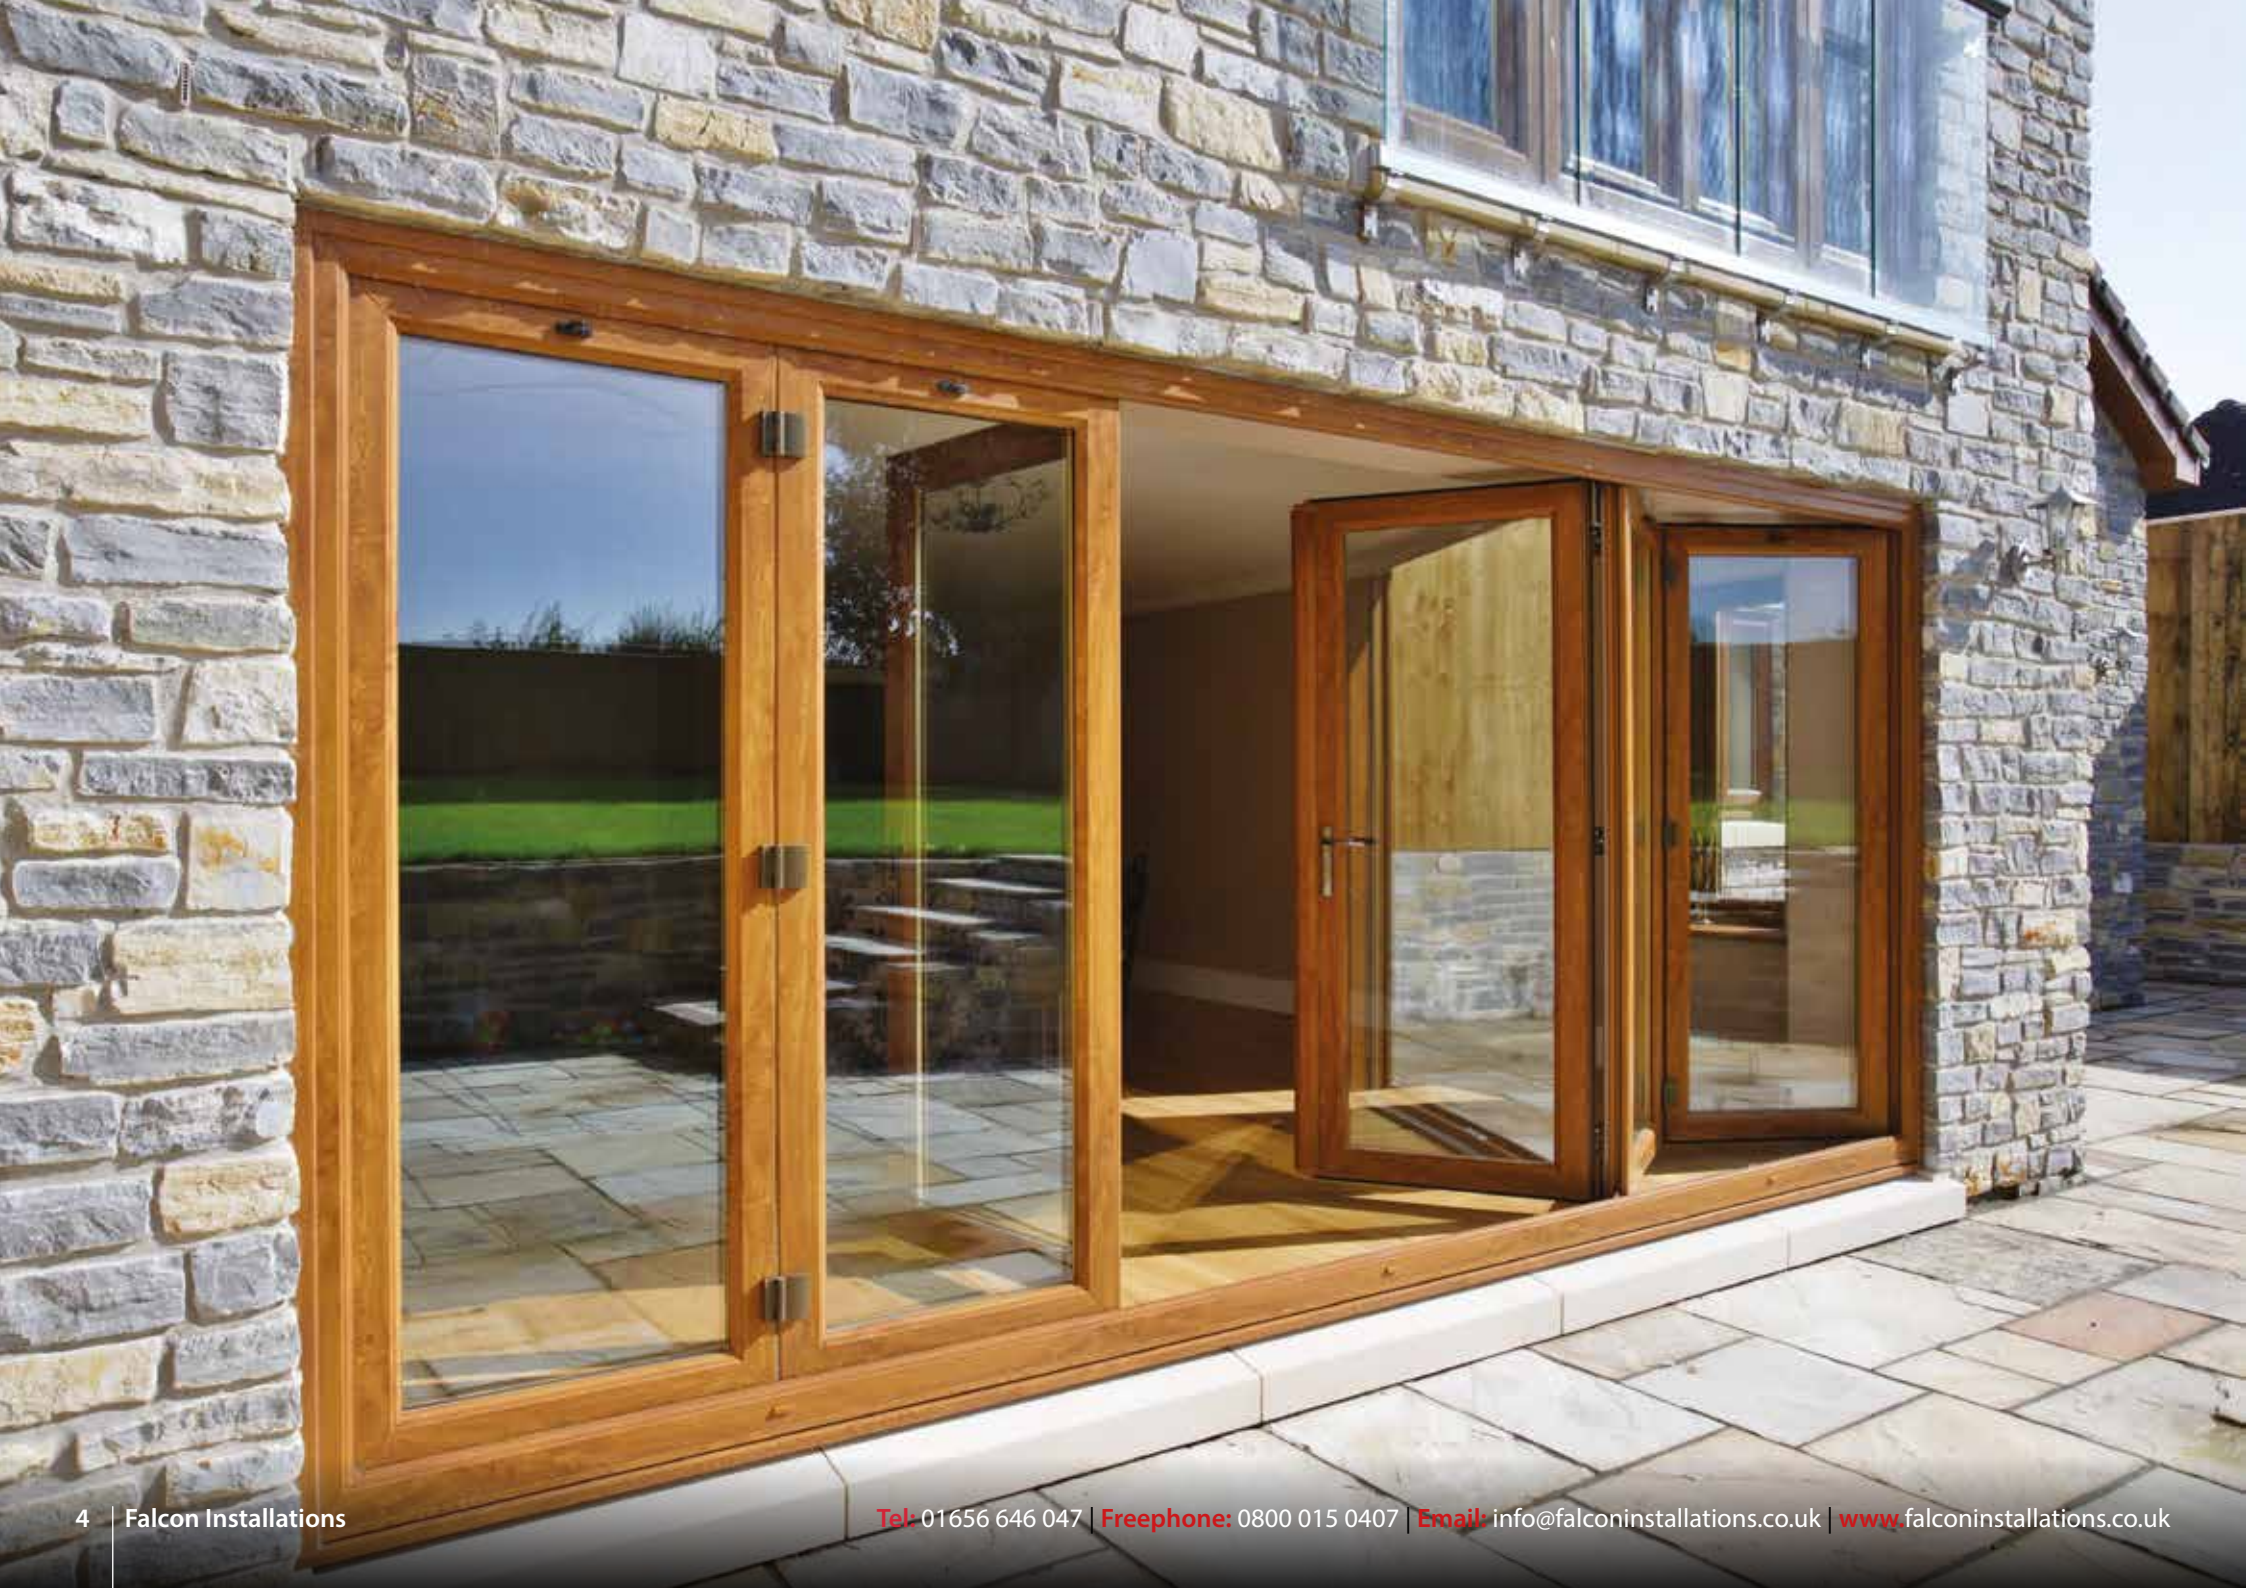

Our uPVC vertical sliding sash windows combine all the benefits of modern, high performing materials with the classic charm of a vertical slider.

Traditional style designs such as a deep bottom rail and Georgian bar options give the window the look of a timber vertical slider. The difference is that this uPVC alternative is easier to clean and is manufactured to be highly energy efficient and secure.

And with modern features such as a tilt-in facility for easy cleaning, our uPVC vertical sliders are an easy way to add period character to your home, without the costs or maintenance of real timber.

Features and benefits:

- 128mm front to back dimension makes it suitable for replacing traditional timber box sash windows
- Low line PCE glazing system
- Available in white, cream and range of coloured woodgrain foil finishes
- Choice of cills available
- Deep bottom rail and sash horn detail replicate the look of original timber vertical sliders

Whether you want a stylish new front door, or a new entrance onto a patio or garden, we have the right door for you!

We offer a range of low maintenance uPVC doors including: entrance, patio, French and bifolding. Our patio and French doors are perfect leading from a kitchen or conservatory onto an outdoor space; with our bifolding doors opening up your home to bring the outside in.

Similarly our uPVC entrance doors suit almost every property; but for something extra special, our composite doors create an attractive entranceway that's sure to be noticed.

Aluminium doors and windows

Aluminium is a naturally robust, durable and secure material that offers a sophisticated and contemporary appearance that complements any home. It's an effective thermal insulator, preventing warmth from escaping and reducing your carbon footprint. Aluminium is also 100% recyclable, making it a popular eco-friendly choice.

With their concertina style, our aluminium bi-folds offer an impressive, sophisticated look and slim sightlines to maximise the view outside the home. The natural strength of aluminium combined with our advanced multi-point locking system offer enhanced protection.

The aluminium bi-folds come a range of customisable configurations and a wide choice of handles and accessories. The unique design

of the doors delivers outstanding thermal efficiency and protection from the elements. The doors boast a sturdy and reliable sliding mechanism, allowing for swift and easy operation.

Features and benefits:

- Sleek, contemporary finish
- A plethora of bespoke colours to choose from
- Environmentally friendly and sustainable material that is 100% recyclable
- Outstanding weather resistance and thermal efficiency
- 10-year manufacturer warranty, with a lifespan of up to 60 years

uPVC Roofline Products

Replacing your old wooden fascias and soffits, along with broken guttering, can greatly improve the look of your home. We offer uPVC roofline products which don't warp, crack, flake or peel.

Our rainwater and guttering product range comes in four styles of draining system, so you're sure to find the best fit for your project. Contemporary homes might favour the Square Line range, whereas our Half Round products are suited to more traditional properties. We can also install Dry Verge Boards or Eaves Protection Boards, where your existing felt has perished, to further enhance and protect your roofline.

For conservatories and similar projects, Ogee is the ideal drainage system for small constructions. Buildings requiring heavy and high capacity drainage solutions should use our Deep Flow systems.

Our range includes: fascia boards, cellular boards, cladding, soffits and architraves, which are available in white or woodgrain effect finishes.

Conservatories & Porches

Take the hassle out of extending your home with a conservatory or porch from Falcon Installations. These stunning structures are fully customisable, crafted to your exact requirements and specifications and available in an array of beautiful finishes to truly make it your own.

Hand-pick the conservatory's colour from a diverse palette, including traditional colours such as White and Cream. Give the conservatory a natural aesthetic with our range of woodgrain foils, such as Golden Oak or Rosewood. We offer a range of designs, from a contemporary style to a more classic appearance.

Victorian

A popular style distinguished by a faceted front, giving a curved appearance. A particular favourite with period properties; although the clean lines look great on any type of home.

Edwardian

A flat fronted style offering excellent use of floor space, due to the square or rectangular base. It's sloping roof and contemporary style is suited to most properties.

Double-Hipped

Double-hipped conservatories have a pitched roof on both sides, rather than having a flat face connecting the conservatory to the wall. As such, it's ideal for height restricted properties such as bungalows.

Gable

A gable fronted conservatory adds a sense of grandeur to any home, with the front panel of the roof remaining upright to create a feeling of height and space within the conservatory.

Custom

Design your dream conservatory with our custom service. This is particularly useful for odd shaped spaces and means your conservatory is completely unique to you.

Conservatories & Porches

The conservatory has remained a popular and affordable alternative to a single storey extension. Their layout provides your home with a versatile living space that provides a seamless link between your home and the outside world.

Improvements in glazing and design of the modern conservatory have seen it shake it's "too hot in summer, freezing in the winter" reputation of days gone by. Combining energy efficient materials for the frame and thermally efficient glass or solid roofing results in a comfortable temperature all year-round.

The security of your home is paramount. Our conservatories come with a range of security features, including a 5-point locking system, high-quality glazing and anti-pick locks, to keep your home and family safe. Falcon's expert team are on hand to assist you throughout every stage of the project, from survey and design to post-construction.

Conservatory warm roofs

Being too cold in the winter, boiling hot in the summer would render any room unusable. Revive your old, inefficient conservatory and get the most out of your investment by transforming it into a comfortable living space with a conservatory warm roof from Falcon Installations.

Replace your existing conservatory roof with a bespoke product that is designed by you. The roof can be crafted to the shape of your existing conservatory. Choose from a range of roof materials that are available in a variety of colours to perfectly complement your home.

Say goodbye to the days of high energy bills, either trying to heat it up or cool it down. The solid conservatory roofs are more thermally efficient than a glass or polycarbonate equivalent. Some of our roof systems are up to 15 times more thermally efficient than the roof it's replacing.

The interior of the conservatory is just as important as its exterior. The fine plastered

ceiling finishes the room, magnifying the conservatory's available light and space. You have the option to install speakers and spotlights or hang lighting to further add to the ambience of the conservatory.

There's no need to worry about sacrificing the lighting of the conservatory. Skylights can be fitted into the conservatory roof, in areas of your choosing. They offer a seamless transition that allows a bright stream of natural light into the room.

Our conservatory roofs have been precision engineered to include multiple layers to protect your home from the elements and outside noise. The roof comes with a 10-year manufacturer warranty and Falcon's outstanding after sales care for peace of mind. Every roof is installed to meet Building Regulations and our friendly team of experts are on hand to make the process as smooth as possible.

Conservatory warm roofs

Features and benefits:

- Crafted to fit any existing conservatory
- Precision engineered for outstanding thermal efficiency
- A wide range of materials and colours available to perfectly match your home
- Option to fit speakers, skylights or LED lighting into the roof structure
- 10-year manufacturer warranty

By installing our windows you could increase your disposable income by up to £341* per year through heating bills.

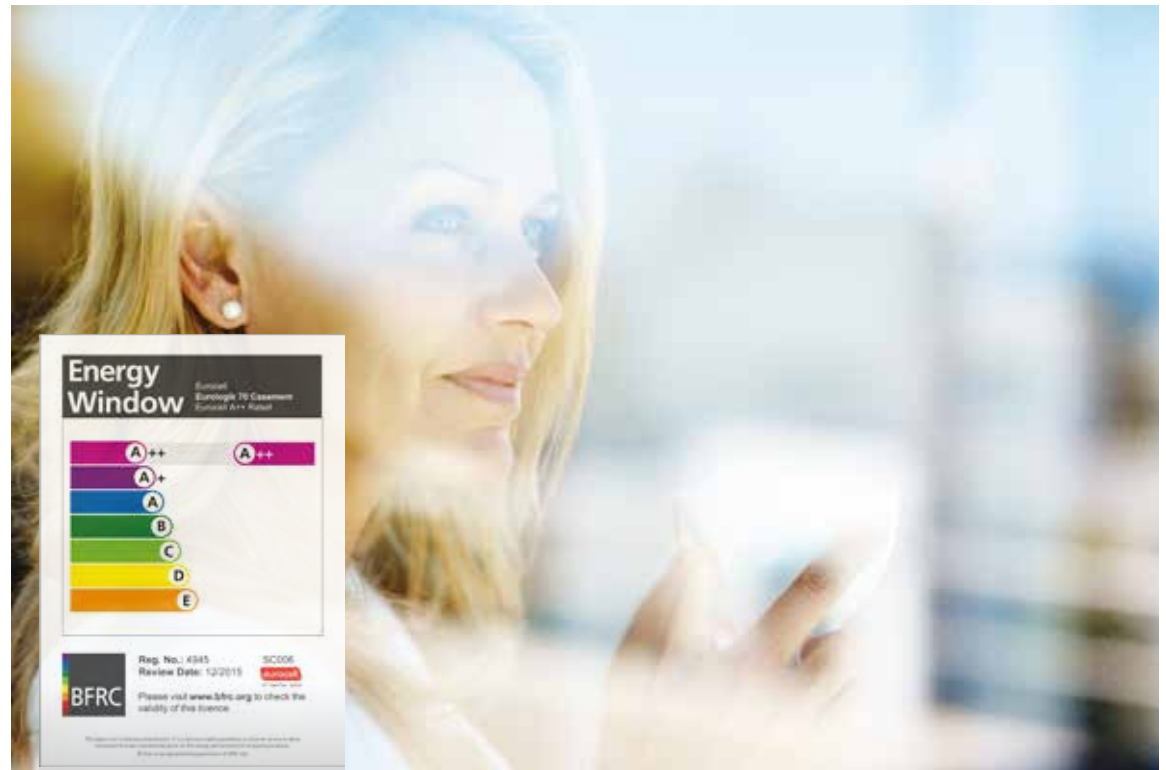

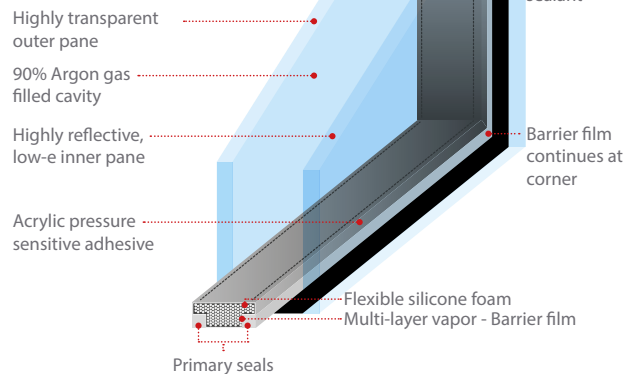

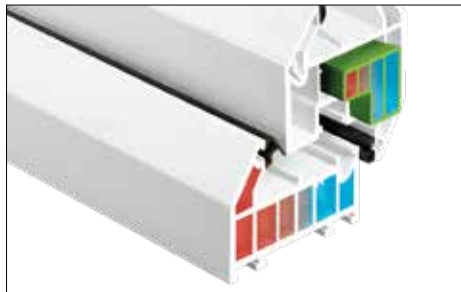

*Glass & Glazing Federation's Energy Saving Calculator

Window Energy Ratings (WERs)

A window's energy efficiency is determined by how much heat it keeps inside a building. One way to measure this is through WERs, which are displayed similarly to the rainbow scale used on white goods; with G (red) the least energy efficient and A (green) the most efficient.

A-rated Systems – How we do it

Our windows can achieve an A energy rating, partly due to our highly insulating sealed units. These are made up of low-e glass separated by a warm edge spacer, and filled with Argon gas, improving the thermal efficiency of your home.

Enjoy a warmer home

20% of all domestic heat loss is through the windows and doors; so upgrading to energy efficient windows will help to keep your home warmer and can even save you money on your heating bills.

Falcon installs A-rated windows which help insulate your home against cold and draughts. Not only does this keep your home warmer, it helps reduce your carbon emissions and fuel bills too.

Falcon and the environment

Our windows, doors, conservatories, porches and

roofline products use uPVC which is recyclable; helping to reduce CO₂ emissions during the manufacturing process. It also means less waste on landfill sites as both the uPVC frame and glass of our products are recycled. Our components are manufactured to the ISO14001 environmental performance standard.

We also carry a Valid Waste Carriers License so you won't have to worry about leftover waste from the installation.

Patterned / textured glass

To provide privacy in your home where needed, we offer a range of attractive patterned glass designs. Each one offers a different level of privacy and can be used to obscure views, or as a decorative piece for an entrance door.

Decorative glass

Make a statement with our decorative glass options. Our lead / colour combos, bevelled and fusion elements effects can be used to create contemporary or traditional motifs. We can even create custom designs for a unique look.

Leaded glass

Our leaded glass options can be used in conjunction with colour for a stained glass effect, or used to make decorative patterns, such as our Elizabethan and Windsor designs, which look great on traditional properties.

Georgian bars

If you like Georgian bars but want something a little different, our Gold and Chrome Georgian bars provide a wonderfully opulent finish to your home, perfectly complementing white and wood grained windows alike.

Bespoke designs

For a truly unique look for your home, we offer a bespoke glass design service to create exactly what you want. We can also copy existing stained glass in your home, for a consistent appearance when replacing windows / doors.

Acoustic glass

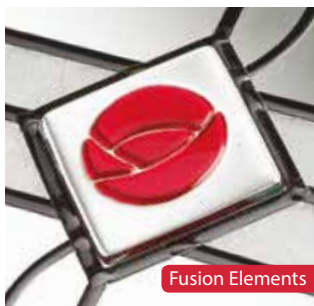

Acoustic glass reduces outside noise by up to 40 decibels, allowing you to relax and enjoy your home in peace and tranquillity. This option is perfect for homes near a busy main road, motorway, or airport, or in a large town or city centre.

Your home's security should never be compromised, and we design our products to ensure your windows and doors remain safe and secure.

Windows

Our windows are designed to be durable, but also offer excellent security through using a highly secure multi-point locking system. Windows can achieve Secured by Design status, giving you extra peace of mind.

- Unique combination of a robust central deadlock, bi-directional bolts and roller cams offers high levels of security
- Designed to meet Secured by Design requirements
- All components adhere to the latest British Standards Institute kitemark recommendations
- Internally glazed - the glass can't be removed from outside

Doors

All of our doors meet industry standards and we work closely with the police, under the 'Secured by Design' scheme, to give you protection and peace of mind.

We're so sure of our products that if you suffer theft from your property, by forced entry through products we've installed, we'll replace it free of charge.*

*This does not extend to entry gained via breaking the glass

- Multi-point locking system for maximum security and peace of mind
- Lock designed to reduce risk of jamming
- Stainless steel face plate and rolling cams are corrosion resistant
- 2 anti-lift bolts preventing door lock being dislodged from keeps.

A series of horizontal dotted lines for taking notes, overlaid on a faint, semi-transparent image of the house.
